

## MICA® ML601 LED

The **MICA® ML601 LED** is a special version because it is additionally equipped with 2 x 6 red LEDs. As a result, this hand lamp can optionally also be used as a signal lamp. Its case is made of high-quality, impact-resistant nylon and the lens is made of tempered glass. This mechanically and technically high-quality cordless LED hand lamp is characterized among other things by the user friendliness and the longevity, even with daily use.

The lamp has an emergency light function (plugged into the charger, the lamp lights up in case of power failure). In addition, the user is informed by a capacity display about the available (residual) energy. In addition, a NiMH (nickel metal hydride) battery is used, which is currently considered the most environmentally friendly variant. Another advantage of NiMH batteries is that a higher capacity is achieved with the same size; a memory effect is avoided. that they are repairable and maintenance-friendly. The batteries are changed easily.

### PRODUCT FEATURES

- Can also be used as a signal light
- Rechargeable
- Robust splash-proof housing
- NiMH battery (environmentally friendly)
- TÜV certified

### TECHNICAL DATA

Photometric Data	
illuminant	1 W LED 2 x 6 rote (Signal-) LED
Lighting duration approx.	6 hrs
General Data	
Battery	6 V - 1350 mAh
Housing	Nylon
Glass lens	Hardened glass
Reflector	Aluminium
Ambient temperature	-20 °C to +45 °C
Dimensions (LxWxH) approx.	120 x 64 x 55 mm
Weight approx.	275 g (with battery)
IP code	IP54 (splashproof)
Item-No.:	40__114471

**Note:** For charging, the charger MLC and the power supply IL2 are needed
