

SETO LED DOUBLE-SNAKE

With the **SETO LED DOUBLE-SNAKE**, a new generation of quickly installable work and safety lighting is launched. As with the SETO LED SNAKE, the **DOUBLE-SNAKE** can also be conveniently, quickly and easily unwound from a roll and installed. Installation is as simple as possible with cable ties or loop dowels.

The high IP67 protection rating of the rope (converter IP65, connector IP44) enables use in damp and dirty environments. The flexible and at the same time extremely tough rope can also be laid around corners and is at the same time extremely resistant to mechanical influences.

The highlight of the **DOUBLE-SNAKE** is that the rope light is equipped on both sides with 180 LEDs per metre and per side! This means that the rope light shines on both sides and is predestined for use in stairwells or lift shafts. Alternatively, it can also be used in corridors or tunnels without much effort.

PRODUCT FEATURES

- Extremely bright
- Highly robust and flexible
- Various mounting accessories available

OPTIONAL ACCESSORIES

Connection cable 1.5 m + connector
Clips (screwable)
T-connector
End cap
Hose connector
SETO LED SNAKE connection cable standard
