

TELESCOPE TRIPOD

Simple tripod with attenuation and steel push rods. It reaches a height of over 4.5 meters when extended. The various sections are fixed with clamping rings.

The individually extendable legs are prolongable and with steel tips that provides a safe stand. The separately extendable feet balance out bumps, and unevennesses on the ground without problems.

A DIN bolt with 30mm is undetachably mounted in the 1st push rod. Preferably, this tripod is used for civil defense (as THW), but also for police and firefighters.

In its retracted state, the stand can be tied up with an undetachable strap. The **TELESCOPE TRIPOD** comes with a fastening set (guy ropes and pegs).

TECHNICAL DATA

<i>General Data</i>	
Height	1.15 to 4.58 m
Max. payload	25 kg
Adaption	DIN bolt
Special feature	Air Cushioning
Packing size (L x W x H)	1,120 x 200 x 200 mm
Item no.:	1410000323
