

SETO TELESCOPE CONSTRUCTION SITE TRIPOD

The professional **SETO TELESCOPE CONSTRUCTION SITE TRIPOD** made of stainless steel is equipped with air damping. This allows the tripod to retract smoothly after loosening the wing screws, even if a spotlight container with two spotlights is mounted. This eliminates the risk of damage or even injury when the tripod retracts.

In addition, the feet are not pointed, but flat and have holes so that the tripod can also be fastened to the ground with the ground pegs included in the delivery.

PRODUCT FEATURES

- Made of stainless steel – never rust again
